15 - We welcome your comments below. What is something/are some things that the instructor does well, e.g., something you hope that the instructor will continue to do in the class in the future?

• Really sweet professor, open to many different opinions/viewpoints.

• I love her perspective on our assigned books. While it is a communication class, I value the philosophical perspective that she brings; It makes the class feel deeper and more constructive than just learning how to communicate as we learn how to communicate WHY we think the things we do on a deeper level than what is typically done.

• When I switched to her class after the first week she took the time to help me catch up and integrate into the class well. It was much appreciated.

• Continue doing the group projects where a group leads the class. It is very good.

• Professor Waggoner is very engaging with the class and has been a great professor. She is good at being firm with the way she grades things and is also good at having engaging questions and counterpoints for the benefit of the class.

• N/A

• This class's structure is well thought out, and I really enjoyed all the different perspectives on the same topic that each of the books provided. Both the written and oral assignments were good and required a decent amount of critical thinking on the material, especially where one's own opinions were required to answer the question.

• Class is very interactive and she allows students to share their ideas whenever they have one.

16 - Make a suggestion(s) for improving the course (a criticism alone is not helpful; tell your instructor how you would fix any problem).

• I would make the time requirements for speeches less severe. For example, I received high scores on the speeches themselves but was docked points for being under time. While I understand having requirements, I don't feel like my grades on the speeches reflected my effort and speech itself because I lost points due to talking faster when nervous.

• N/A

• None.

• N/A

• I enjoyed the student-led lessons, however I often felt that it was difficult to communicate with my group members, which may be a shared sentiment across different groups. Maybe having some "Discussion plan" submission, consisting of a page or so of bullet points/topics, would help groups be more organized? (especially if there is some template to go off of)

• No criticisms.
